

Three Years of Impact: New Jersey's Statewide Student Mental Health Initiative

Data April 1, 2023 - March 31, 2026

As the first and only state in the nation to launch a comprehensive, statewide teletherapy initiative¹, New Jersey is leading the way with its bold investment in supporting student mental health through its groundbreaking partnership with Uwill. This innovative program offers students at 45 participating institutions of higher education no-cost, unlimited, 24/7/365 access to immediate mental health support, seamlessly complementing the work of campus counseling centers. This initiative champions student well-being, boosts student success and completion rates, and cultivates a resilient, future-ready workforce.

Immediate appointment with a licensed therapist based on student preferences

Direct crisis connection with a licensed therapist

Wellness – study skills, stress management, student leader support, career readiness

Student Support When and Where They Need It

✓ 31% of therapy sessions occurred after hours

Monday through Friday 5PM – 9AM and weekends when traditional support services may not be available

✓ Accessed in 10 states and 20 countries

Support worldwide, ensuring access for those studying abroad, taking classes online, traveling for athletics, visiting home during breaks, or interning in a new environment

✓ Nearly 34,000 therapy sessions during typical breaks

Access to support 24/7/365 including summer and spring breaks and winter intersessions

“

I am so happy that I am finally receiving therapy, it was long overdue. My insurance does not cover virtual therapy, and I need [it] as someone who is going back to college to finish my bachelor's and working a part-time job.

Student

“

The ability to assist students in crisis after hours is a game-changer, and the availability of bilingual counselors ensures that we can support our diverse student body in their preferred language.

County College Administrator

“

I love having my weekly conversations with my therapist because of how understanding and rational she is. She always gives me a new perspective. She is very calm, patient, and gracious. I am forever grateful for Uwill.

Student

¹ Uwill

² Therapy sessions include video and phone sessions. Chats are scheduled, synchronous sessions between students and providers. Messages are asynchronous notes students can send to providers after a meeting.

³ Project Healthy Minds 2025 based on calculation using average insurance co-pay for therapy ranging from \$20-50 for 114,537 therapy sessions.
